Richard Nesseler
12 Apostles Helicopters

"We've tried other similar systems in the past but we know we can depend on our Rugged Video Systems to capture great video every time; which is critical when video sales account for nearly half a million dollars a year in added revenue. We chose Rugged Video because of their excellent customer service and flexibility in meeting our requirements and would recommend them to any other flight tour operator."

Mark Fitzsimmons
Blue Sky Helicopters

"I've used a number of video systems over the years and recently moved to the Rugged Video system for my Flight Tour. Rugged Video is the best system on the market because it records high quality video in a well put together package with features no one else can offer."

Commander Upload Software

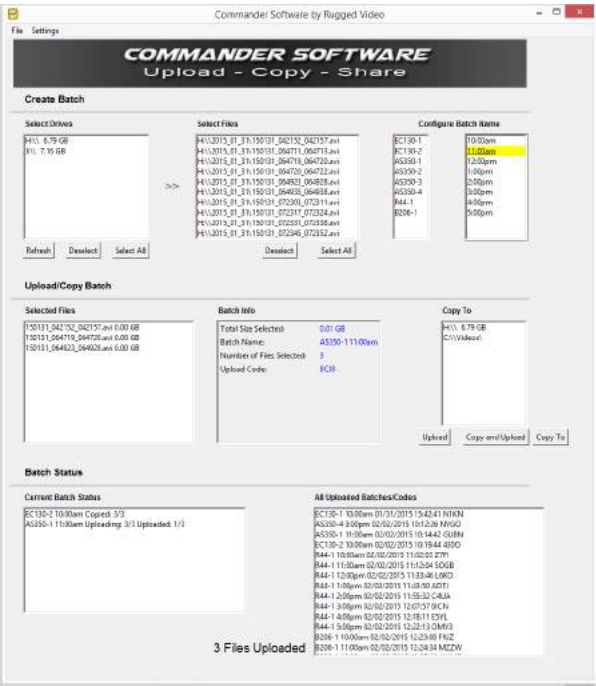

Double your video revenues by offering customers digital delivery of their videos. The Commander Upload Software is designed to maximize sell-through and increase the marketing exposure of your tour operation.

Step 1

Use the Commander Upload Software to Upload or Copy in just a few clicks and generate your customer access code. The software automatically uploads and creates a custom webpage for your customer.

Step 2

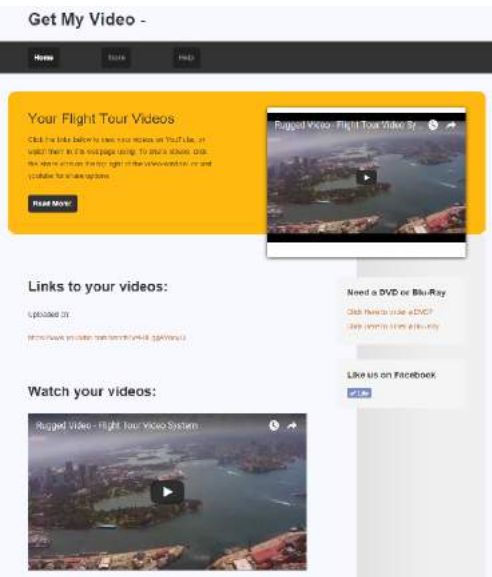

Sell the Digital Access code, USB Copies, or both to your customer. Customers can go to GetOurVideo.com on any web-enabled device, enter their access code, and see their videos.

www.ruggedvid.com

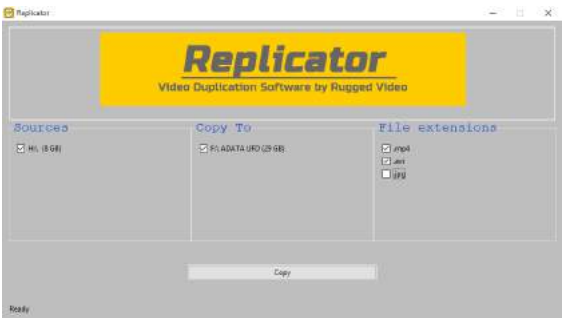

Step 3

Customers access their videos online and can view and share. Videos are hosted on YouTube and are posted with link-backs and specific keywords promoting your flight tour. YouTube is the second largest search engine in the world, with popular videos appearing on the first page of Google Search. Every time a customer views or shares their video it increases the marketing exposure of your flight tour.

Replicator Fast Copy Software

For operators preferring not to upload, the replicator software can simplify your workflow with easy to use, one-click, rapid duplication software. Just insert your drives and click "Copy". Duplicates are available for your customers in 60-120 seconds. Videos can be played back on any PC or Mac.
